COSMOS
APPROVED

Olivatis® 20 is a cold and hot process oil-in-water emulsifier particularly recommended for sprayable to pourable emulsions. **Olivatis® 20** is ideally suitable for wet wipes emulsions.

Due to its excellent compatibility with both low and high polarity oils and electrolytes and its tolerance to pH and temperature, **Olivatis® 20** is an outstanding emulsifier for troublesome emulsions too. Rather than an emulsifier, **Olivatis® 20** can be classified as a hydrophilic lipid, forming fluid O/W emulsions, very fresh and light and with a unique and pleasant velvet effect.

Olivatis® 20 should be used as a cold process emulsifier at an emulsifier/oil ratio of 1:1 or 1:2; for low viscosity emulsions it is recommended to use a low amount (0,1-0,2%) of a popular stabilizer (such as xanthan gum, guar gum, etc).
